

BNAM 2024

Baltic-Nordic Acoustics Meeting
May 22 - 24 2024 Espoo, Finland

FIRST ANNOUNCEMENT

The next BNAM will be held in Espoo between the 22 May and the 24 May in 2024.

BNAM is a relatively small, broad topic conference. This means that it has often been difficult to attract attendance from the academic world, whilst at the same time BNAM has not been seen as “practical” enough to attract the consultants and the industry.

The upcoming BNAM conference will be targeted even more than before to the people practicing acoustics every day. This means that one of the conference days will be dedicated to tutorials/courses/software demonstrations and the remaining two days will be reserved for presentations of papers. We would like to encourage people from consultancy offices and companies to present a wide variety of case studies and their good practices to make the presentation content valuable for participants.

Naturally, we will invite companies to have booths to present the newest measurement gear and software, thus having a large exhibition during the conference.

Sessions will be organized at a later date, all entry subjects welcome!

Best regards

Henrik Möller on behalf of the BNAM2024 organizing committee.
